REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Prior arts of record does not disclose a method for monitoring a traffic state in a traffic network set forth in claim 9 in which when an edge fixed at an effective bottleneck is detected between downstream free traffic and upstream synchronized traffic, the traffic state upstream of the bottleneck is classified as conforming to pattern of dense traffic representative of the bottleneck, the pattern includes one or more different consecutive upstream regions of different state phase composition. Further, prior arts of record does not disclose selecting a best fitting pattern from among the stored patterns of effective bottlenecks based on traffic influx to a particular effective bottleneck when a downstream edge between downstream free traffic and an upstream dense traffic phase is detected at the particular effective bottleneck; and predicting a temporal/spatial profile of traffic parameters for the particular effective bottleneck using traffic parameter information associated with the selected pattern as taught in claim 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
